

Trading in the LEOcoin Internal Platform Frequently Asked Questions

How long does an order stay 'live'?

The order is live for 7 days from the time of the placement as long as the price remains equal to or more than the minimum price.

When is an order cancelled?

An order is cancelled when the order price falls below the minimum price.

Why does the LEOcoin platform use a random system to match buy and sell orders?

Without the LEOcoin platform randomised system, Members who want place an order would have to monitor the order list and current price tables so that the order is placed when it can be filled. The randomised system means that this monitoring of trading activity is no longer needed. This is also a more equitable way of fulfilling orders.

Why does the price go up if there are not many buy orders on the Internal Platform?

The auto-buy process matches buy orders at the lowest available price. As the buy orders get filled, the average price will rise.

How is the price of LEOcoin determined?

The Price is driven by demand and supply. Member activity alone determines the price level.

Why is the LEOcoin sell order limit set to 100 LEOcoins per day? A maximum amount for sell orders has been set in order to increase liquidity on the platform.

Why does the time to execute an order vary?

The platform matches buy and sell orders. The time taken to complete an order depends entirely on the number of orders awaiting execution. The more orders waiting, the shorter the time to execute.

What plans do you have for Trading on the Internal Platform?

We are constantly looking for opportunities to improve the services we provide to Members. An announcement will be made when we are ready to launch an updated version.

Why is the price of LEOcoin on the Internal Platform not the same as the price on external exchanges?

The price on both the Internal Platform and on the external exchanges are set by supply and demand. The Internal Platform price is set by Members; the price on each external exchange is set by their members. LEO plays no part in determining these prices.

Is the price of LEOcoin on the Internal LEOcoin platform connected to the price on external platforms?

There are many platforms that trade LEOcoin. They are completely independent of each other. The price on each platform is determined by their own supply and demand levels.

Who sets the price on the Internal Platform? The price is set by supply and demand. The Members' trading activity alone determines the price level.

Trading in the LEOcoin Internal Platform Frequently Asked Questions

Why are my LEOcoins held in an Escrow Ledger for 90 days? LEOcoins can be acquired in different ways. Most Members receive LEOcoin as an award on achieving specific targets while building their LEO business. These LEOcoins are escrowed for 90 days to ensure that, in the case of a sales refund or a charge back, the awardee's entitlement can be adjusted accurately. Having an Escrow Ledger also helps protect the users of the platform.
